PROJECTS

Project Name — Quiz (website)

The app features randomized questions, real-time answer validation, and automatic score tracking. Users receive instant feedback and a final score summary upon completion. Designed with a clean, user-friendly interface to enhance the overall quiz experience.
Technology Used: - HTML, CSS, and JavaScript

Project Name — Expense Tracker (Website)

A responsive web application that allows users to manage and track their daily expenses. The app provides features to add, edit, and delete expenses, along with visual insights through charts to better understand spending patterns. It includes summary cards for total income and expenses, filtering options, and graphical representations for easy financial analysis.Technologies used:
The main aim of developing this application is to help users monitor their spending, organize financial records efficiently, and gain clear insights into their financial activities.
Technology Used: - HTML, CSS, and JavaScript

Project Name — Design Agency (website)

Implemented responsive layouts, interactive elements like sliders and accordions,and clean UI/UX design. The site effectively showcases services, team members, portfolio, and includes a functional contact form.
Technology Used: - HTML, CSS, and JavaScript
